

The Wolf Farms Precision Team is hoping that all had a wonderful Holiday. Today's edition of the "Spotlight" will cover some of our services and how they may help get you ready for spring.

## Meter Service

Get your seed meters serviced and readied for spring. The Wolf Farms Team will run your meters through the following processes to ensure the best performance.

- Cleaning of the meter assembly
- Visual inspection, identifying:
  - Cracked cases
  - Worn parts
  - Poor gaskets
  - Damaged belts
- Running them on the MeterMax Ultra Stand
  - Ensuring that the meters performance is up to standards
  - Printed results of each meter's seeding performance
  - Row-by-row report of work done to each meter/tube.
  - Amp draw analysis on vDrive/SpeedTube systems.

We test all Precision Planting meters as well as many original equipment meters.

## Planter Inspections

- Bring your planter in and our precision team will inspect it from hitch to closing wheels.
  - Visual checks for frame cracks and flaws
  - Hydraulic Leaks
  - Consumables (disc openers, parallel linkage and bushings, closing assemblies)
  - Wheel bearings and lift mechanisms,
  - Drive systems, carrier bearings, chains where applicable.
- Fees
  - Meters are \$25.00 each
  - Planter inspections are \$15.00 per row.
